

Garden gold (Specially for home garden and nursery)

Garden Gold is specially manufactured organic manure suitable for home garden & nursery i.e. ornamentals, vegetables, aromatic & medicinal plants etc.

Special features of Garden gold:

- Garden gold when applied in the soil, provides more oxygen to root system.
- Garden gold when applied increases aeration in the soil, provides more oxygen to root system. This in turn increase root growth & root health.
- Garden gold helps to prevent soil borne diseases as it helps to increase the beneficial soil microflora.
- Garden gold helps vigorous growth of garden plants. Keep them lush green. Enhances flowering, prevents flower & immature fruit drops.
- Garden gold helps in biotic & stress management.

Application:

- Garden Gold is recommended at the rate of 50 to 100 g per plant depending upon the age & size of the plants. Repeat the application after every 30 days for more healthy plants.
- Garden gold can be applied along with chemical fertilizer if required.
