

# RCM-RAPID (Botanical pest Immobiliser)

RCM-**Rapid** is a unique extract derived from Indian origin herbs by proprietary fermentation process. The various alkaloids and metabolites released by this process are very effective for management / suppression of hard to kill Mites and sucking pests like Thrips on crops like Chilli, Tomato, Okra, Melons, Fruit crops like Grapes, floricultural crops like Roses etc. RCM-**Rapid** being botanical extract is non-hazardous to environment, non-toxic to higher animals and as such is an ideal input in organic farming.

## Mode of action:

RCM-**Rapid** works as an antefeedant & works on hormonal system of mites / insect pests thereby immobilizing them. The mites / insect pests stop feeding within half an hour after spray and get immobilized because of starvation in about 48 hours.

## Application:

- Spray RCM-**Rapid** when the infestation is seen which can cause, an economic damage to the crops at an interval and repeat spray after 15 days.
- Dilute 1.5 to 2 ML of RCM-**Rapid** per Litre of clean water (i.e. 300 to 400 ML in 200 liters of water). Mix thoroughly and spray on both sides of the foliage.

## Compatibility:

RCM-**Rapid** is compatible with almost all commonly used pesticides, Bio fertilisers. Still we strongly recommend checking compatibility before mixing other compounds.

## Safety:

Though botanical extract, RCM-**Rapid** should be kept out of reach of children, food, feed and fodder.

## Disclaimer:

RCM-**Rapid** is not claimed to be a conventional Pesticide / Acaricide, Maximum Residue Limits study is not available for the product.
